Hi

This is Satya Mallick from LearnOpenCV.com

Just a quick reminder, **10% discount** for "**Computer Vision for Faces**" expires in about 1 hour. Time is ticking away!

<http://courses.learnopencv.com/>

To be fair to everybody. **I won't be able to give this discount after**

.....
the deadline even if it means losing some business.

I am blown away by the massive response so far from people around the world buying this course. We have people from the United States, India, Germany, China, Brazil, Korea, Great Britain, Kazakhstan, Vietnam, many countries in Europe with a **total of about 40 countries!**

"But I can't afford it"

I have received a few emails from people who said they would love to buy the course, but cannot afford it. I have tried my best to price it at a level so people around the world can buy it while I barely break even with this launch.

Invest in yourself. Think of this course as an investment. It costs approximately \$179 today. Would you be able to make at least \$1,000 from this course in the next three years? If the answer to that question is YES, you gotta find a way to pay for it. If the answer is a NO, you should not take this course because what you pay for the course is a small fraction of what you will pay in time taking the course.

Paying for a course forces you to be more disciplined. You reap greater value by paying because the things you obtain without a cost, you typically value lightly. Did you finish your last free online course?

Lastly, I do acknowledge that some people may be in extreme financial difficulty. In that case, I assure them that I will keep producing quality content on my blog which will always be free.

Thanks!

Satya
